Serial Number: 09/429,446

Art Unit: 1741

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-4 and 35-43, drawn to electroplating apparatus, classified in class 204, subclass 198.
- II. Claims 5-7, drawn to a contact member, classified in class 204, subclass 297.01
- III. Claims 8-13, drawn to electroplating apparatus, classified in class 204, subclass 240.
- IV. Claim 14, drawn to electroplating apparatus, classified in class 204, subclass 230.2.
- V. Claims 15-34, drawn to an electroplating method, classified in class205, subclass 102.

The inventions are distinct, each from the other because:

Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each invention has separate utility as an independent electroplating apparatus. The features of one subcombination are not required for any of the other subcombinations. See MPEP § 806.05(d).

Inventions I-IV and V are related as process and apparatus for its practice.

Serial Number: 09/429,446

Art Unit: 1741

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of inventions I-IV can be used to perform processes other than that of invention V. The process of invention V requires the use of a low current density for a first period of time and the application of a higher current density for a second period of time. The apparatus of inventions I-IV could be used to carry out constant current processes in which the same current is used for the entire process.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to Marcia Kelbon on December 14, 2000, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if

Serial Number: 09/429,446 -4-

Art Unit: 1741

one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William Leader, whose telephone number is (703) 308-2530. The examiner can normally be reached Mondays-Fridays from 7:30 AM to 4:00 PM eastern time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kathryn Gorgos can be reached at (703) 308-3328. The fax phone number for *official* after final faxes is (703) 305-3599. The fax phone number for all other *official* faxes is (703) 305-7718. Unofficial communications to the Examiner should be faxed to (703) 305-7719.

Any inquiry of a general nature or relating to the status of this application should be directed to the receptionist whose telephone number is (703) 308-0661.
